

IN THE CLAIMS

The listing of claims will replace all prior versions, and listing, of claims in the application:

1. (currently amended) A universal serial bus integrated device, comprising:
a housing; ~~and~~
an integrated circuit board, disposed in the housing, comprising a plurality of universal
serial bus slots thereon; and
a first peripheral device disposed in the housing, detachably connected to one of the
universal serial bus.
2. (cancelled)
3. (currently amended) The integrated device as claimed in claim ~~2~~1, wherein the
first peripheral device comprises a converter and a first universal serial bus connector, inserted
into one of the universal serial bus slots, such that signals of the first peripheral device are
converted to universal serial bus signals by the converter.
4. (currently amended) The integrated device as claimed in claim ~~2~~1, wherein the
first peripheral device is ~~shaped into a plate~~ flat.
5. (original) The integrated device as claimed in claim 4, wherein the first peripheral
device comprises a hard disk drive.

6. (original) The integrated device as claimed in claim 4, wherein the first peripheral device comprises an optical disk drive.

7. (original) The integrated device as claimed in claim 4, wherein the first peripheral device comprises a modem.

8. (original) The integrated device as claimed in claim 4, wherein the first peripheral device comprises a floppy disk drive.

9. (original) The integrated device as claimed in claim 1, further comprising a central processing device, detachably connected to one of the universal serial bus slots.

10. (original) The integrated device as claimed in claim 9, wherein the central processing device comprises a converter and a first universal serial bus connector, inserted into one of the universal serial bus slots, such that signals of the central processing device are converted to universal serial bus signals by the converter.

11. (original) The integrated device as claimed in claim 1, further comprising a universal serial bus port disposed in the housing and a second peripheral device, connected to the integrated circuit board through the universal serial bus port.

12. (currently amended) The integrated device as claimed in claim 11, wherein the second peripheral device comprises one selected from the group consisting of a hub, a keyboard, a mouse, a printer, a scanner, and a digital camera.

13. (original) The integrated device as claimed in claim 1, wherein the integrated circuit board further comprises a second universal serial bus connector for connection with other computers.

14. (original) The integrated device as claimed in claim 1, further comprising an opening, corresponding to the integrated circuit board in the housing.
